

The Mitchell Times

Fall 2012 Edition

From the Mitchell Family

If for any reason you should need our assistance, we are never more than a phone call away!

(800) 237-3835

Please visit our website: nemitchell.com for information on our products:

Heating Oil
Propane
Electricity
Wood Pellets
Heating & Cooling

On behalf of the entire Mitchell family and every Mitchell employee, we thank you for the overwhelming outpouring of concern, respect and affection expressed by so many of you following the recent passing of Norbert Mitchell Jr. Your kind words and heartfelt stories about Norbert were a beautiful tribute to his nearly five decades of service to our company, our customers and our community. Thank you for celebrating his life with us.

*In Memory of
Norbert Mitchell Jr.*

FROM THE ENERGY EXPERTS:

Did you know that a tankless water heater only heats water when you need it? So you get an endless source of hot water, while also saving money on your energy costs by not heating and reheating the same tank of water. Whether you are washing the dishes, washing your clothes, or drawing a hot bath, tankless water heater technology will supply endless hot water to your lifestyle demands – even if you do them all at once! To see if you are a good candidate for this heating equipment, call our office today.

TRANSFORM YOUR SPACE with a GAS LOG FIREPLACE

Transform your existing wood burning fireplace with the convenience of propane gas. A gas log set doesn't overheat the room or require any change in the appearance or structure of your fireplace. Instead, it delivers a realistic, room-enhancing fire at any moment, any day of the year. Operating a gas log fireplace is easy. With the click of a button, you can turn on your ambient fire in a matter of seconds. If you're interested in owning a gas log fireplace of your own, Mitchell carries a complete line of premium log sets and we can install and provide the propane gas supply as well. Call today for more information so your family can have a warm, cozy fireplace this holiday season!

Price Protection Plans

Fall 2012 Edition

“Are You Protected?”

Cold weather is just around the corner. Make sure you are prepared for the 2012-13 heating season by enrolling in an oil price plan. Choose from our Prebuy, Cap and Fixed Price Plans. For information on how to enroll, visit us online at www.nemitchell.com

Lower Electricity Rates

Mitchell, in partnership with Verde Energy, has just lowered our electricity rates to **0.0775/kWh** fixed. We are proud to have been successfully offering electricity for nearly two years now and Mitchell customers are seeing substantial savings after switching from CL&P. Not only do we offer a lower per kilowatt hour rate, but **we'll send you \$50 for signing up!** It only takes a couple of minutes to switch and there's no interruption in service. There are no in-home visits required and CL&P will fully service your account. Although the rate is fixed, you can cancel at any time. Visit www.nemitchell.com/electricity and start saving today! If you are already an electricity customer with us, call us today if you would like the lower fixed rate.

Spotlight

This edition of Spotlight shines on Dale Morey. Dale joined the Mitchell team in October 1994.

He is a Delivery Driver in the winter months and a Propane Service Technician in the summer months. Dale is a multi-talented employee who takes pride in all that he does. When he is not serving our customers, Dale enjoys spending time with his wife and his two daughters camping, skiing and snowmobiling. He also enjoys working on his 1969 pick-up and keeping up with NASCAR.

Words from a Ridgefield, CT Customer

"We recently became new customers of yours and how delighted we are with your services. Everyone who helped us was courteous, knowledgeable and very professional. We feel very secure knowing that Mitchell will be taking care of us. You have put together a very fine organization. Your employees represent you well."

Our Green Initiative:

We recently converted one of our service vehicles to run on propane. Emissions from propane powered vehicles release 12-18% less CO2 than those of a gasoline-powered vehicle, and represent a 20% overall reduction in greenhouse gas emissions.
